JOURNALS

Computer & Information Systems Abstracts Journal

International coverage of theoretical and applied computer research as well as business and marketing information. *Coverage includes*: computer software and applications; computer electronics and mathematics; computer privacy, security and other legal issues; activities of major electronics and computer companies. *Two volumes, 20 issues per year.*

Conference Papers Index

Access to the latest international research papers and findings presented at scientific and technical conferences and meetings throughout the world. *Coverage includes*: aerospace science/engineering; animal and plant science; biochemistry/biology; chemistry and chemical engineering; civil and mechanical engineering; clinical and experimental medicine; electronics and general engineering and technology; geosciences, material science and engineering; mathematics and computer science; nuclear and power engineering; pharmacology; physics; astronomy. *One volume, 12 issues per year plus annual index.*

Electronics & Communications Abstracts Journal

Coverage of world-wide theoretical and applied research as well as business and marketing information. *Coverage includes*: electronic physics; electronic systems; electronic circuits; electronic devices; communications. *One volume, 10 issues per year.*

ISMEC Bulletins

"Information Service in Mechanical Engineering" reviews, categorizes, cites and indexes pertinent information from more than 250 primary sources in the fields of mechanical and production engineering as well as engineering management. *Coverage includes*: management and production; measurement and control; mechanics; materials; devices: production processes, tools and equipment; energy; power; transport; handling; mechanical engineering; natural resources; mechanical engineering in science and industry. *One volume, 12 issues per year plus semi-annual indexes.*

Oceanic Abstracts

Covers all aspects of the world's oceanic research and related engineering studies. *Coverage includes*: marine biology; oceanography; living and non-living marine resources; marine pollution; meteorology; geology; geophysics; ships; shipping; navigation; acoustics; optics; remote sensing; government and law; coastal and deep sea environments. *One volume, 6 issues per year and year-end cumulative index.*

Pollution Abstracts

Access to the world's literature vital to environmental pollution research and its related engineering studies. *Coverage includes:* air and water pollution; solid wastes; noise pollution; pesticides; chemical contaminates; radiation; land pollution and reclamation; effects on plants, animals and humans; legal and economic aspects; toxicology; alternate energy sources; environmental law and education; statistics, standards and criteria; treatment; control. *One volume, 6 issues per year plus annual index.*

Safety Science Abstracts Journal

Literature coverage of the broad interdisciplinary science of safety devoted to identifying, evaluating and eliminating or controlling hazards. *Coverage includes*: general safety; industrial and occupational safety; transportation safety; aviation and aerospace safety; environmental and ecological safety; medical safety. *One-Volume, 10 issues per year.*

Science Research Abstracts Journal

Coverage of world literature with summaries for the academic, industrial and governmental communities. *Coverage includes*: superconductivity; magnetohydrodynamics; plasmas; theoretical physics; gas, semiconductor, solid state, liquid and chemical lasers and masers; electro-optical theory and devices; lasers and electro-optical device applications and effects; quantum electronics; unconventional energy sources. *One volume, 10 issues per year.*

Solid State Abstracts Journal

Coverage of world literature on the theory, production and application of solid state materials and devices. *Coverage includes*: solid state physics; chemistry; metallurgy; measurements; devices; thin films. *One volume, 10 issues per year.*

PURPOSE: *Pollution Abstracts* organizes, summarizes, and indexes worldwide technical literature on environmental pollution. Published six times a year, *Pollution Abstracts* is designed to help environmentalists, academic researchers, librarians, industrial engineers, lawyers, waste managers, and federal, state, and local government officials locate published materials on pollution-related topics.

SCOPE: *Pollution Abstracts* covers air pollution, marine and freshwater pollution, sewage and wastewater treatment, waste management, toxicology and health, noise pollution, radiation, land pollution, and environmental policies, programs, legislation, and education. Aspects covered include measuring and monitoring techniques, statistics, treatment and control, recovery and recycling, standards and criteria, economic, social, and legal aspects, and the effects of contaminants on animal and plant species in nature and in controlled laboratory experiments.

METHODOLOGY: Every year, the *Pollution Abstracts* editorial staff screens over 2,500 primary sources, foreign and domestic. These include technical journals, conference proceedings and papers, books, government reports, and documents that have only limited circulation. The relevant material is abstracted or annotated, organized into chapters, and indexed by subject and author.

ABSTRACTS: The abstracts, up to 200 words in length, give the basic information reported in the original material, including conclusions and methods. Review of the abstracts and annotations assists the user in determining which of the literature should be read in its entirety.

ACCESSION NUMBERS: Abstracts and annotations are numbered sequentially throughout the volume. The first two digits represent the year, e.g., 81-00001, 81-00002, 81-00003, etc.

AUTHOR ADDRESS: The address given for the first author indicates where the work was carried out or where correspondence should be directed. Every effort is made to give a complete address.

SUBJECT INDEXES: Each abstract or annotation is assigned up to 12 controlled terms which spotlight the main topics in the original material. In the subject index, these controlled terms are permuted (rotated) alphabetically to refer the user to a citation of interest when the name of the author is not known. The controlled vocabulary from which the controlled terms are chosen by the editorial staff if published in the Annual Cumulative Index. Each issue contains its own subject index for the abstracts in that issue.

AUTHOR INDEX: Each issue contains an author index. An annual cumulation is available in the Annual Cumulative Index.

MASTER LISTS OF PUBLICATIONS: Publications sited in *Pollution Abstracts* are listed in the 1980 Annual Cumulative Index.

ACRONYMS AND ABBREVIATIONS: Alphabetical listings of acronyns and of abbreviations, symbols, and prefixes appear in each issue.

CALENDAR OF EVENTS: A calendar of meetings, exhibits, and conferences relevant to enviromental research and pollution control appears in each issue.

COMPUTERIZED DATABASE: *Pollution Abstracts* is also available as a computerized database, searchable via online systems provided by Lockheed Information Systems, Bibliographic Retrieval Systems, and European Space Agency-Information Retrieval Service. Alternatively, an organization with the need for frequent access to the *Pollution Abstracts* database may lease the database magnetic tapes directly from Cambridge for processing at its own computer facility. For information about online searching or magnetic tape leasing, contact the Customer Service Department at Cambridge Scientific Abstracts.

SUBSCRIPTIONS: a 1982 calendar-year subscription to *Pollution Abstracts* is U.S. $260; Foreign $280 for six issues. Subscriptions are issued on a calendar-year basis only. New subscribers automatically receive any issues already published during the current year.

ANNUAL CUMULATIVE INDEX: The Annual Cumulative Index to Volume 13, Issues 1-6 (1982) will be published at the end of the volume year to facilitate retrospective research. Price: U.S. $125; Foreign $145. Please send your order to the Subscription Accounting Department. A limited number of annual and multi-year cumulative indexes to the previous volumes are also available; please write for a complete price list.

BACK ISSUES: Current subscribers may order back issues on microfilm for Volumes 1-11 (1970-1980) for $50 per volume. PLease specify format-16mm or 35mm, reel or cartridge, positive or negative. A limited quantity of back issues is also available on hard copy; please write for a complete list of back issues.

JOURNALS LIST

Alphabetical by Journal Title

Below is a list of the serial publications which are reviewed regularly by the *Pollution Abstracts* editorial staff. The format is that recommended by the Library of Congress in *New Serial Titles* and not necessarily the title as shown on the publication.

In addition to these serial publications, the *Pollution Abstracts* staff regularly reviews hundreds of special and technical reports, books, conference and symposium proceedings, and other potential sources for information worthy of abstracting.
